

Familial Cases of Endomyocardial Fibrosis in Uganda

Ashvin K. Patel, John L. Ziegler, Paul G. D'Arbela, and Krishna Somers

Abstract

This report describes nine cases of endomyocardial fibrosis occurring in four families. All patients came from Rwanda or South-western Uganda, and five had tropical splenomegaly syndrome as well. It seems likely that genetic as well as environmental factors are operative in the aetiology of endomyocardial fibrosis.
